Psychology As A Moral Science

Moral psychology is the study of moral reasoning, development, or how people integrate moral beliefs and the development of their own character. When psychology meets moral philosophy in moral psychology, it becomes a focus of research that explores how people come to make morally relevant decisions, rather than exploring what moral decisions we should make. It encompasses the study of moral judgment, moral reasoning, moral psychology, and moral decision-making.

Moral Psychology - Ethics Unwrapped

Educational psychology is the branch of psychology concerned with the scientific study of human learning. The study of learning processes, both cognitive and behavioral, involves research on individual differences in intelligence, cognitive development, affect, motivation, self-regulation, and self-concept, as well as their role in learning.

Educational psychology - Wikipedia
